"Hanniman, Krista" <Krista.Hanniman@rcmp-grc.gc.ca> 2/12/2022 7:58 PM

The mainline of the Per runs in a generally southwest direction for some 35 km in a route that roughly parallels the Detroit River that separates Windsor from Detroit, Michigan.

Incorporated in 1902, the Per provides switching services for local customers engaged in the industrial, lumber, steel, agricultural, scrap metal, alcohol, and liquid petroleum gas (LPG) industry sectors as well as serving our sister company, Personal Info. with rail access for our Great Lakes transload facility, connecting these customers to Personal Info. . With these direct connections, the Per allows your cargo to travel to any point in the rail networks of Canada, the United States and Mexico.

All the divisions have a well established communication process with CBSA and the POJs where the RCMP is not the POJ. The intel cell in each divisions are also exchanges information on the situations.

Where the RCMP is the POJ, if a POE is showing signs of protest they will be addressing the situation and liaising with CBSA and our Border integrity members.

Where the RCMP is not the POJ, the RCMP is liaising with the POJ and CBSA, and providing assistance when required. The intel cell are also exchanges on a regular bases.

The exchange also exist with our US counterparts (USBP & CBP) and POC are identified.

All informations are reported to DEOC.

If we get the facts in the AM, we can package into speaking points. As well as the the general updates on the numbers. Anything else.
